Fan Coils

Thermostats

RIGHT FOR YOU

How can a company like Payne know what's right for you? The answer is experience. D.W. Payne and sons started making the right products for their west coast customers back in 1914. Since that time, we've grown nationwide with a brand that provides products that are attractive and affordable. These same principles apply to our family of heat pumps, indoor coils and thermostats. Because this solid lineup of heating and cooling equipment carries the Payne name, you can be sure it's the right product at the right price, right for you.

**Model
PH13**

Comfort All Year Long

Payne understands the decisions involved in choosing a new heating and cooling system. Select a good one and you're a hero. You know the other side of the story. That's why we offer a complete line of effective, efficient and affordable heat pumps. Making the right choice is easy when you choose Payne.

The most popular unit in our lineup is the PH13. One of the great things about this heat pump is the way it looks in your yard. And, beneath that attractive, and corrosion-resistant surface is a smooth-running, energy-saving home comfort machine.

Today's homeowner is as busy as ever, but everyone can use a little refuge from the fast pace of everyday life. The Payne PH13 provides comfort from the hottest day of summer to a snowy, winter evening. At the same time, this economical unit conserves electricity at a commendable 13 SEER (Seasonal Energy Efficiency Ratio) cooling and 7.7 HSPF (Heating Seasonal Performance Factor) heating. That means money-saving comfort year-after-year because Payne builds all of its products for lasting comfort.

Maximize Potential With A Matched Payne System.

Payne always recommends replacing the fan coil when purchasing a new heat pump. Most likely, the fan coil is as old as the heat pump you are replacing, thus reducing the efficiency of the new unit. The older fan coil could contain dirt or other contaminants that would be harmful to the new model. And, the old fan coil may not properly match the new heat pump. Buying a new fan coil also means your entire system will be covered with new product warranties.

Heat Pump and Fan Coil System

COMPACT SIZE

The compact size of the PH13 helps it blend into your landscape. We are able to make this unit smaller without sacrificing performance because of its efficient heat transfer capability.

LONG-LASTING FAN MOTOR

Our high-efficiency fan motor contributes to the performance of the PH13 by braving Mother Nature's worst for years of durable operation.

COMPRESSOR BUILT TO LAST

You can count on years of comfort because the most important component of the entire unit, the compressor, operates with built-in protective features.

SMOOTH, QUIET OPERATION

Rubber isolation grommets create a buffer between the base pan and the compressor to minimize noise from vibrations.

ATTRACTIVE FINISH

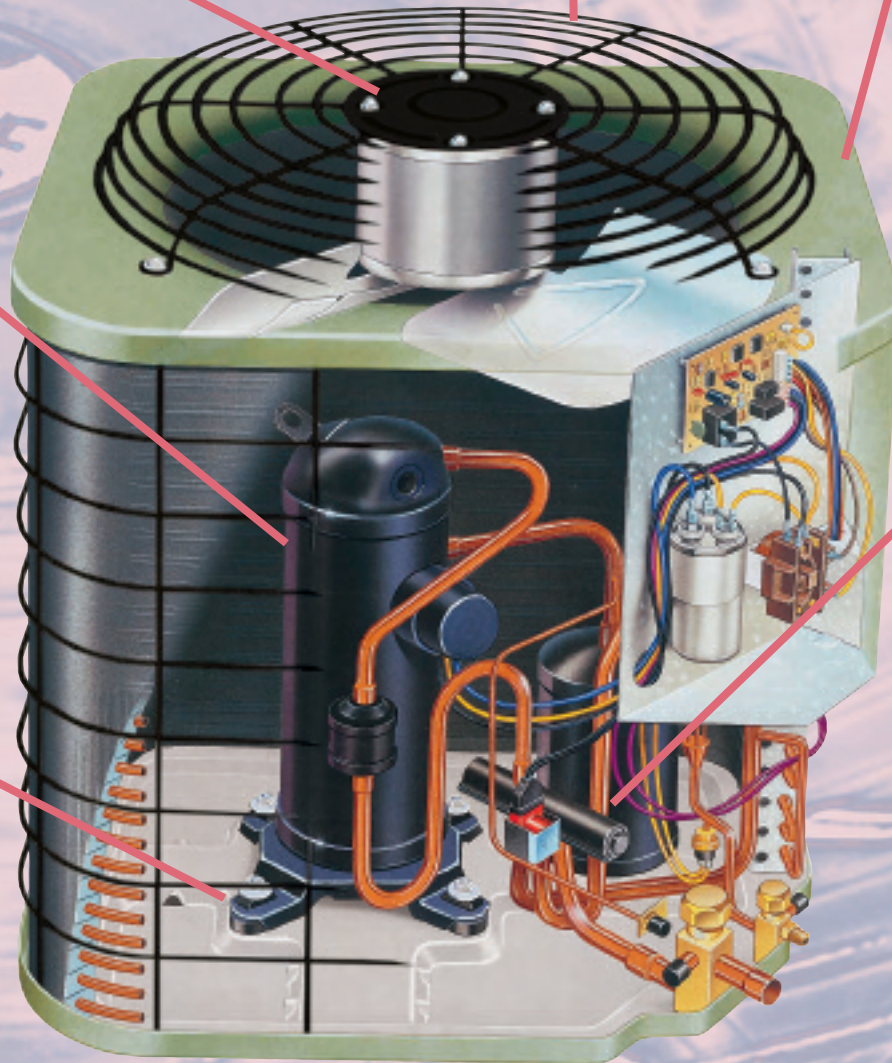

The PH13 looks good today, and will continue to look good for years. The durable and attractive finish resists scratches, rust and corrosion.

SEAMLESS COMFORT

The PH13 effortlessly switches between heating and cooling operation with the help of its reliable reversing valve.

LOW MAINTENANCE

Cleaning or changing the indoor filter regularly will greatly reduce the need for required maintenance of the system.

The Right **Combination.**

Payne's popularity nationwide has grown through offering the right combination of affordability, quality, economy and comfort. We understand the demands of today's lifestyles and that's why we deliver the right products at the right price, right now, right for you. These products make it easier for you to quit worrying about your comfort and start enjoying your life.

OUR WARRANTY

The Model PH13 is covered with a five-year limited warranty on the entire unit. Payne also offers additional optional warranty programs.

Enhanced Heat Pump Performance with a **Payne Fan Coil.**

Model PF No heat pump system is complete without the fan coil. Payne's Model PF fan coil matches perfectly with any of our heat pumps to deliver quiet, energy-efficient comfort. Our copper tube, aluminum fin coil provides exceptional heat transfer needed for heating and cooling effectiveness and efficiency.

Payne Thermostats **Offer No-Hassle Control**

Programmable Thermostat

If you enjoy taking control of your life, Payne's programmable thermostat is the right product for you. This easy-to-program thermostat allows you to set different temperatures for different times of day, according to your schedule. As a result, you can quit worrying about your comfort and get back to enjoying life.

Thermostat

This attractive and reliable thermostat is designed to perfectly complement your new Payne heat pump system. Its easy-to-read display makes operation a breeze.
